COMPACT HIGH-POWER FEMTOSECOND LASER

780, 920, 1040 and 1064 nm / < 100 fs / Up to 5 W

Spark Lasers' ALCOR has been specifically designed for two-photon excitation. It offers clean femtosecond pulses with the highest guaranteed peak power on the market, in an unprecedented compact format and with fixed wavelengths at 780, 920, 1040 or 1064 nm.

The ALCOR compact laser head incorporates the widest range of software controlled GDD precompensation on the market and many options, such as a fully aligned and turn-key AOM for fast power modulation and power adjustment, an integrated pulse picker starting at either at 80 MHz or 40 MHz, as well as coupled Mini2P or FLeX fibers to deliver femtosecond pulses as close as possible to samples. ALCOR is air-cooled and can easily be integrated with the possibility to install the laser head in any orientation. ALCOR's innovative fiber-based design offers high stability, high reliability without any maintenance, making it the perfect industrial laser for scientific applications.
